

PAE - Product Application Example 07 – ETM Delta 9140

SMS Fire Panel Signalling Solution

Monitor status of multiple relay outputs and generate SMS & Email Alerts. Web based management option

ETM Delta 9140 is a standalone alarm relay monitoring unit. A contact open or close event generates customized userfriendly SMS and/or Email alert messages to multiple recipients. It's compact size makes it easy to install inside any standard fire panel. It can monitor up to 7 individual inputs. Relay output can provide remote alarm acknowledgement triggered by text message. Provided in a kit form as complete package including optional SIM card.

Optional remote monitoring & alarm management using ETM IoTConX Web Portal.
